

NOULA 4000 **Penetrating primer**

PROPERTIES AND USES

NOULA penetrating primer provides an excellent alternative to solvent based resin solutions which are normally used to consolidate and bind friable or porous masonry surfaces prior to decoration.

The problems of toxicity, smell and flammability of solvent based resin solutions is eliminated by the use of **NOULA penetrating primer**, The dispersion gives excellent penetration, binding and sealing of friable substrates.

NOULA penetrating primer requires a minimum 1:2 dilution with water in order to be effective as a penetrative sealer.
